Harsh jha

Front End Web Developer

I am a passionate front-end developer with skills in HTML, CSS, JavaScript, and React. While I'm early in my journey, I've already built impactful projects like a Figma-like design tool and a food ordering app. My focus is on creating clean, responsive interfaces and seamless user experiences. I'm committed to expanding my expertise into backend technologies, aiming to evolve into a full-stack developer who can tackle both sides of web development..

Master of Computer Applications (Full Stack Development)
Jain University, Bengaluru, Karnataka
06/2024 - Present

Bachelor of Computer Applications
Girijananda Chowdhury University, Guwahati, Assam
08/2020 - 06/2023

PROJECTS

My-Figma
- https://github.com/Harshjha002/my-figma
- Built a Figma-like application with modern web technologies.
- Recreated design functionalities for collaborative use.
- Integrated real-time updates using Liveblocks for multi-user collaboration.
- Easy to deploy and extend with additional design features.
- **Tech Stack**: Next.js, TypeScript, Tailwind CSS, Liveblocks.

FOOD APP
- https://github.com/Harshjha002/Food-App
- Showcases food items with category-based filtering
- Integrated real-time cart updates and Redux-based state management.
- Smooth navigation with React Router and fully responsive design using Tailwind CSS.
- **Tech Stack**: React, Redux, React Router, Tailwind CSS.
